**YOUR COMPLETE LINE SHAFT
BELT AND PARTS SUPPLIER
WWW.BOWMANHOLLIS.COM**

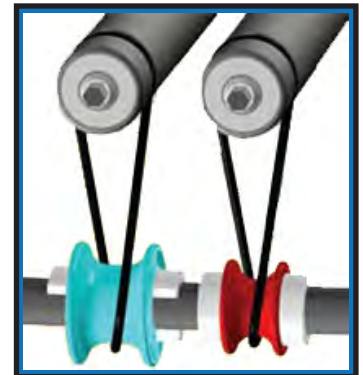

LINE SPOOLS: SOLID AND SPLIT

Bowman Hollis supplies both solid line shaft replacement spools and the easy to replace split spools. Simply pull the two halves apart and place them over the line shaft. Then, snap the two halves back together and slip the round belt over the spool. We also have green Speed-Up Split Spools. Use this larger spool to speed up certain sections of your conveyor system by 44%. Both spools are made of durable Delrin plastic.

C-CLIPS AND SPOOL CONNECTORS

Are your line shaft spools floating on the shaft? This will cause your belts and spools to wear out faster. Prevent your spools from slipping by simply snapping the C-clip over the shaft right next to the spool to keep it from moving. Spool connectors lock two or more spools together on 3" centers helping to eliminate the need for keyed spools.

ROUND OR O-RING BELTS

Bowman Hollis can take care of your line shaft roller belting needs as well. We have a large selection of sizes, colors and durometers to meet all of your drive belting needs.

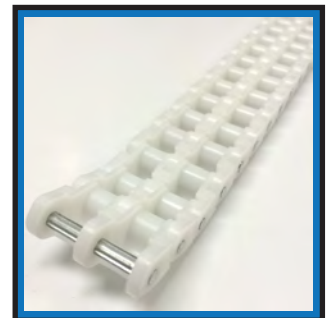

TWISTED BELTS

These specialty belts allow you to quickly replace a broken or stretched out round belt in just minutes! No need to tear down a line, replace belts as needed and keep your line running at peak performance.

LINE SHAFT CHAIN COUPLER

Replace your worn out sprocket couplers with this durable Delrin plastic chain coupler to keep each section of your line shaft conveyor system running in sync.
