

Die Cutting Belts

Atom Machine

Bowman Hollis offers a complete selection of belts for die cutting machines. With dozens of satisfied customers, in many industries, we have the knowledge necessary to keep your machines running. We supply several different type belts, depending on your application and your preference. Industries that we have served include: carpet tile, area rug, furniture, automotive, and many others. Using Bowman Hollis, you get maximum "hits" and lowest operating costs! Our new **Make and Hold** program can ensure that you always have a spare belt available.

Bruno Machine

Styles of belting:

- Nylon core. This is the ultimate cutter belt, and will give the longest service possible. Joined either by hot vulcanizing or cold bonding.
- Solid woven urethane. Good service, easy to splice with hot air.
- Plied European. Very durable, more precise thickness than solid woven. Spliced by either finger-splice or cold bonding.

Splicing: Our well-trained installers can be at your location quickly, with state of the art hot vulcanizing equipment. Of course, most belts we sell can also be joined by your people, either with hot air or cold bonding.

Two locations to serve you:

Charlotte, NC
2925 Old Steele Cr. Rd.
Charlotte, NC 28208
Phone: 888-269-2358
