

Dynaric Strapper Belts

Spending too much money for strapper belts? We can help!

Are you spending a lot of money on belts for your Dynaric strappers? The design of this popular strapper means that normal belts will not work. A relatively thick belt is needed, but the interior pulleys are very small. Normal spliced belts, if thick enough to perform properly, quickly fail at the splice.

Well, **Bowman Hollis** has the answer! We have sourced a belt that is identical to the original equipment. The only difference is that it is much less expensive.

We have in-stock most of the common sizes for the Dynarics, including:

- 730mm x 80mm x 4mm
- 638mm x 80mm x 4mm
- 460mm x 80mm x 3mm
- 655mm x 80mm x 3mm
- 705mm x 80mm x 3mm

And several other common sizes.

These belts are identical to the OEM belt, with good friction against your bundle. They are seamless, so you get long belt life.
