

# GrabMaster™

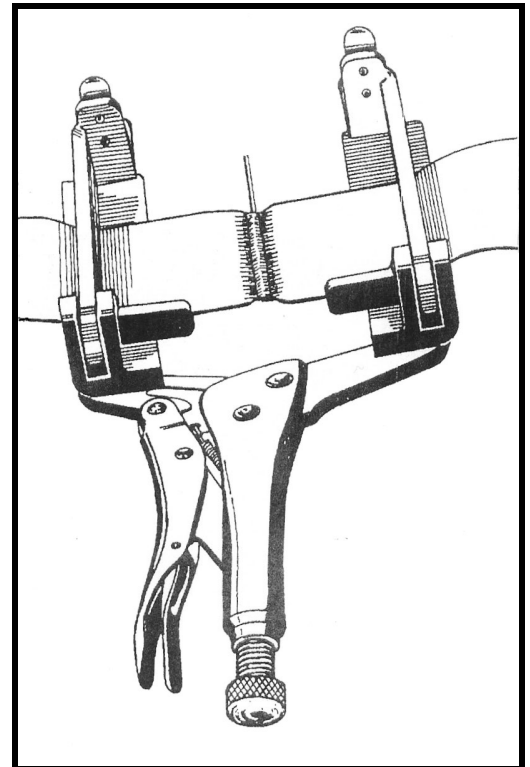

## Belt Puller

Allows one man to do the work of two! **GrabMaster**, which works with all tapes and belts to 4 or 6 inches width, pulls ends together and locks them, so they can easily be laced. Not only does this save labor, but also allows you to use shorter belts, reduce belt replacement, and save on maintenance.

Simply fit each belt end into the **GrabMaster** clamps, close and lock clamps, press handle to bring ends together, and lock so pin can be inserted without effort.

***GrabMaster gives one man the pulling efficiency of two, and can reduce labor costs as much as 80%!***
